

Coinsto

COINSTO WHITEPAPER 1.0

Coinsto is a Cryptocurrency project helping people to learn by others experience. Coinsto is focus on giving value to the people by the people, the platform will only act as a slate to helping individuals and organizations learn from anyone whom volunteers to share his or her experience in any field they operate in.

Problem Statement

Coming into Crypto has never been easy especially with the high volatility nature of Cryptocurrency market. On research to find out why people are scared of Cryptocurrency industry, the responses are not far-fetched from lack of quality education/information about the industry. Ponzi scheme has giving bad name to every online businesses so a lot of people still have the belief that Crypto project are Ponzi scheme there exist today and disappear the next.

It's sad people still thinks of Crypto project this way, statistics shows that a lot of people have cryptocurrency phobia due to it volatility nature and their heart are harden it will take quality education to change the way they think about Cryptocurrency and begin to use them.

Coinsto advantages

We have seen all the disadvantages of lack of quality education in the industry. Coinsto platform is created to enable decentralized learning, to let people teach people from their own experiences. We believe there are Crypto enthusiasts all over the world who understand the Crypto industry and are willing to share their Crypto success stories, the does and the don't in Crypto that helps them understand how the new economy works.

Coinsto will only act as a slate to these people to share their experiences to shape the world.

Coinsto utility token

Coinsto utility token will be used as a reward point for the volunteers who will share their experience to help others. Experience can be shared in two formats:

I) **Video content:** video talk about your experience you want to share on Coinsto platform upload into a Google drive, copy the link and fill a form that will be provided on the website with few information about the user and payment wallet to receive \$CSO.

II) **Text Content:** Volunteers can share their experience in details in text format, making sure it's well explanatory for newbies and those who intend to use crypto but are locked out because of fear. Send it as a word document to coinsto official email with the user's details and wallet to receive \$CSO.

Coinsto Programs

Below are programs that will help the platform achieve its goal of quality information and crypto education.

- i) **Meet ups:** Meet ups will be held in different locations to drive crypto adoption by helping people to understand the industry and become crypto users right after each meet ups. At each meet up coinsto will airdrop its utility token CSO to all the participants after helping them to create and own a cryptocurrency wallet.
- ii) **Ambassadorial program:** Ambassadors are the official envoy who will represent coinsto platform in different part of the world. They will be empowered to help people understand the cryptocurrency industry and how to use it. The program is for everyone who is capable and interested to mentor people within their localities and across the globe.

Form will be made available for interested individuals who want to be part of the program on coinsto official website.

- iii) **Bounty Program:** Bounties will be conducted from time to time to engage the community and encourage them to share coinsto content to reach far and wide to touch many lives.

Features

Pay to Teach (PTT): Coinsto utility token CSO is created to pay those who have the desire to share their ideas, experience, to shape the world. Simply record a short video clip(good quality) or put it in writing, send it to Coinsto admins for review, if your content meets the platform standards it will be uploaded to Coinsto official website and the sender gets one million(1.000.000) CSO credited to his or her account instant.

Store of value: CSO is a good store of value. Holders of Coinsto platform utility token CSO are in title to a percentage of their total holdings in their ERC20 wallets.
